

Free FTP software solutions

FTP is always the best way to upload a lot of files onto your hosting account, we have picked out some of the free ones that we think are worth trying:

Filezilla

FileZilla Client is a fast and reliable cross-platform FTP, FTPS and SFTP client with lots of useful features and an intuitive interface. Features Include:

- Drag & drop support
- Configurable Speed limits
- Supports FTP, FTP over SSL/TLS (FTPS) and SSH File Transfer Protocol (SFTP)
- Cross-platform. Runs on Windows, Linux, OSX and more
- Supports resume and transfer of large files >4GB

AceFTP

It's cool, uncluttered drag-and-drop interface, designed in a Windows XP fashion, lets you transfer files quickly and efficiently and navigate with ease between folders, both on Web sites and on your computer. Features Include:

- Windows XP-Style Interface
- Store and configure your connections using the explorer-style advanced site manager
- Make server-to-server file transfers
- Open several FTP sites easily
- Resume broken transfers

FireFTP (Firefox Browser Extension)

FireFTP is a free, secure, cross-platform FTP client for Mozilla Firefox which provides easy and intuitive access to FTP servers. Features Include:

- Cross-platform: Works on Windows, Mac OS X, Linux
- Secure: SSL/TLS support, same encryption used with online banking and shopping
- Synchronization: Keep directories in sync while navigating
- Automatic reconnect and resuming of transfers
- Seamless integration with Mozilla Firefox
